Mission A1011

Remarks

Camera No. 1

Satisfactory. Some trouble in the metering of film through camera. (level bubble not on same exposure as clock.) There is still a shifting of distance between clock and bubble. Clock showing up good a beginning of mission and then fades out. Apparently goes out of focus.

Camera No. 5

Counter not evident for entire mission
Static Marks
Point A of track was Albuquerque, but camera not turned on until Amarillo
Large amount of cloud coverage at east turn of track. Could not plot east turn.
Negative is "flat" and "thin" "Pinholes" in emulsion.

Camera No. 3

Counter not evident for entire mission
Did not turn camera on until Amarillo.
Clock visible but very faded out. Camera ends at 11:43 when camera 5 ends at 1320. Contact is

Camera No 3 (cont.)

good, resolution good.

Camera No. 2

Counter not evident for entire mission
Did not start until Amarillo
Clock not operating for entire mission.
No change in clock reading from first exposure
to the last.
Contrast very light, "washed out" negatives.

Camera No. 4

Counter not operating for entire mission
Did not start until Amarillo
Camera ended before 2 and 3.

Cloud coverage intensive in some areas of
eastern portion of mission.
